Title: New Employee Endpoint

(Any decision I have made which I would get clarity from the Product Owner I have marked with PO approved, to indicate the assumption I have made)

Story ID: US-1

Story points: 3 (Small)

Description:

As an HR Administrator
I would like to be able to add a new starter
so that they can gain access to OneHub and take full advantage of their employment package.

Acceptance Criteria:

- Fields to store:
    - EmployeeNo - generated and unique
    - Title - free text - *PO approved*
    - Firstname
    - Surname
    - DOB
    - Gender - free text - *PO approved*
    - Email (must be unique)
    - Address - can be stored in a single field - *PO approved*

Technical Notes:

- As part of this development it was identified we will need a retrieval endpoint to be able to confirm the new employee has been added
- Please add a Guid identifier as the row primary key

Test cases:

- Given an Employee request
  And the specified fields are all correct
  And the email provided does not already exist
  When a request is sent
  Then a successful response is return
  And the response contains the new employee

- Given an Employee request

And some data is missing
Then a bad request is returned

- Given an Employee request
  And the specified fields are correct
  And the email provided already exists
  When the request is send
  Then a bad request response is returned
